## HAVE YOU HEARD ABOUT OUR ALKALINE HAIR REMOVAL TREATMENT?

DMK Alkaline is a specialised treatment designed to painlessly remove fine vellus hair (peach fuzz) from areas of the skin. It gently dissolves the hair whilst also working to reduce hair re-growth with continued use, anywhere on the face or body.

This treatment can also improve conditions like ingrown hairs, folliculitis and acne affected skin through its hair removing capabilities and bacteria killing properties.

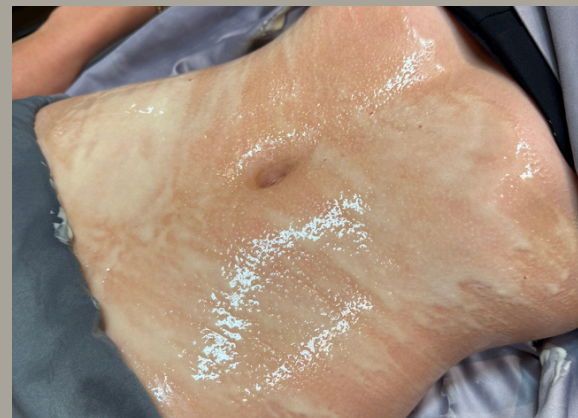

It can also promote smooth skin by reducing pore size and helping to manage conditions like acne, pigmentation and congestion. Ask one of our therapists about this treatment next time you're in Salon.

## SUMMER BODIES ARE MADE IN WINTER

We're sure you've heard of DMK's signature Enzyme Therapy by now, but did you know that you can also use it on your body?! DMK Body Enzymes are the best way to keep your body looking and feeling firm.

The treatment is specifically designed to encourage the body's skin to perform at its best. We use it to help revise cellulite, fluid retention, dry skin, crepe-like loose skin, poor circulation, ingrown hairs, hyperpigmentation, scarring, stretch marks and acne. If you have lost a lot of weight but still carry loose skin, a tailored program using DMK's Body Enzyme Therapy can help to tighten and snap the skin back into place!

DMK creates skin revision treatments so you can love the body you live in.
