3 THINGS YOU MAY NOT KNOW ABOUT DMK ENZYME THERAPY

**THIS IS YOUR SIGN TO
BOOK IN**

1- DMK sources 100% natural derived botanical ingredients from all over the world to get the most pure & active source. They are between 80-90% active & contain no synthetics or nasties!

2- DMK's Enzyme Facials work deep down within the skin on a cellular level with all your skin cells instead of just superficially on the surface with your dead skin cells, as many other facials only do.

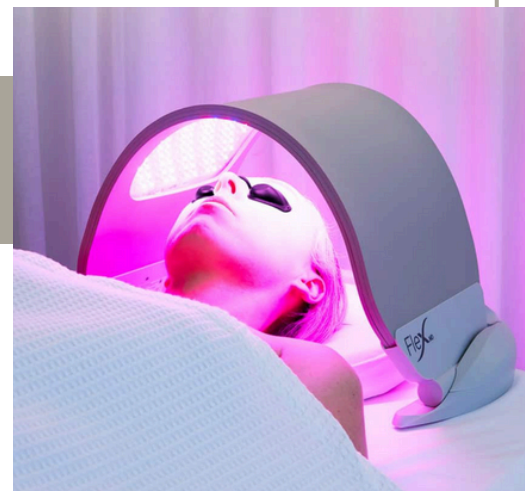

3- DMK ingredients work with our skins biochemistry & get transdermally delivered down to a cellular level where they store for 8 hours & get slowly released as the skin needs them.

WE BET YOU ALSO DIDN'T KNOW THESE THINGS ABOUT LED LIGHT THERAPY

1 - LED light therapy was originally developed by NASA in the 1980s to help plants grow in space. Scientists soon discovered that the technology had potential health benefits for humans as well, including wound healing and pain relief.

2 - The different colours of LED lights penetrate different depths into the skin & treat different skin types & conditions.

3 - It is a gentle, non-invasive treatment alternative that successfully treats a variety of skin conditions, including acne, rosacea, and psoriasis. It can help to reduce inflammation, stimulate collagen production & improve skin texture and tone.
