ADVANCED SKIN

HIFU - High Intensity Focused Ultrasound

LOOK 5-10 YEARS YOUNGER

HIFU is the world's most advanced treatment for skin firming, lifting and tightening, which is considered the next best thing to a full surgical facelift.

NO needles, surgery, recovery, expensive Dr bills and NO DOWNTIME!

HIFU uses high-intensity focused ultrasound energy to gently lift, tighten and firm the skin from deep below the surface.

HIFU is safe and effective for many skin types and can dramatically improve the appearance of:

- Sagging Neck
- Double Chin
- Loose Jowls
- Droopy Eyes
- Saggy Stomach

For best results we recommend two HIFU treatments 6 months apart, with maintenance treatments advisable after that.

PLASMALIFT

ERASE YOUR WRINKLES INSTANTLY!

PlasmaLift is a non-surgical treatment which removes wrinkles and shrinks your skin, instantly right before your eyes. PlasmaLift is the easiest way to reverse the signs of ageing quickly, without surgery, needles, lengthy recovery time and expensive Dr bills.

PlasmaLift is the Ultimate Eyelid Lift and will refresh tired hooded eyes in a flash without the need for surgery!

PlasmaLift removes wrinkles in these areas:

- Eyelid Lifting and Under Eyes
- Forehead and Frown Lines
- Crow's Feet
- Skin Tags and Sunspots
- Cheek Lines and Nasolabial Folds
- Jowls and Neck Tightening

The PlasmaLift pen creates an arc which instantly shrinks the skin and tightens the wrinkle, so it disappears. After treatment small, dry spots will be present on the area, with the crusts taking 5-7 days to fall off. Usually only one treatment is required, however for deep wrinkles two treatments may be required.

DOTLESS PLASMALIFT

Another option is the Dotless PlasmaLift which leaves no dots and has no downtime, however up to 4 treatments is required to match the effectiveness of one Dot PlasmaLift treatment.
