Who wants to warm up this Winter
with a Fabulous
Hot Stone Massage??

Hot Stone Massage therapy melts away tension, eases muscle stiffness and increases circulation and metabolism. The idea behind Hot Stone Massage therapy is that the direct heat of the stones relaxes muscles, allowing the therapist access to their deeper muscle layers. The Hot Stones also expand blood vessels, which encourages blood flow throughout the body. The Hot Stones have a sedative effect that can relieve chronic pain, reduce stress and promote deep relaxation.
