SUNSCREEN IS THE ULTIMATE DEFENCE

One of the most important things you can do for your skin is to apply a good quality sunscreen every day, all year round!

Sunscreen protects your skin from the sun's harmful UVA and UVB rays, which cause skin aging, fine lines, wrinkles and age spots that make skin look prematurely older.

The dangerous sun's rays also cause sunburn and are carcinogens (cancer-causing), which is why you should invest in a sunscreen which offers broad-spectrum protection against both types.

DMK Soleil Defence SPF50+

is designed to block the sun and not your pores. Soleil Defence SPF50+ offers superior non-greasy broad protection from both UVA and UVB rays. Offering the ultimate SPF50+ waterproof high protection to protect you against the harmful sun.

DMK Soleil Protect SPF15

is a light non-greasy sun moisturising crème that provides protection without clogging pores. Also suitable for use on acne prone or oily skin. A light protecting moisturising cream suitable for underneath make-up.
