AUTUMN SKIN TIP

There are several different benefits for particularly exfoliating our skin in Autumn.

The summer sun may have left its mark on our skin, and a gentle exfoliation regimen may help to fade hyperpigmentation.

UV light also decreases the skin's natural desquamation process, so we might end up with a little more dead skin built up than is ideal.

Summer also brings hot & humid weather and an increase in sebum production, between the sweat, dead skin and the oil, we might find our skin is a little more congested than we'd like, especially when we are wearing masks.

In Winter, it is especially important that our skin be open to hydrating and healing ingredients, and a layer of dead skin can prevent skincare from absorbing and working effectively.

Please DO NOT use an abrasive exfoliation product with coarse beads or a scrub. These products harm your skin and break down your skin's natural protective barrier which we need to seal in moisture & protect from damage.

Our DMK Micro Peel product is a gentle non-abrasive exfoliant that works to lift & clear away debris and dead cell material quickly & easily.

Micro Peel helps to rebalance, refresh and smooth the skin for a fresh glowing complexion.

Recommended for most skin types, Micro Peel helps to revise and refresh dull, coarse or wrinkled skin.

Transform your skin from dull to beautifully glowing!

Amazing work girls.

The DMK products you use are amazing and also your service.

Keep up the awesome work :)

Today was my first facial at Amour in Horsham, & what a lovely calming experience!!

I had the Deluxe DMK Signature facial by Erin - & it was an hour of absolute luxury!

Thank you SO much Erin!

I'll certainly be making it a regular occurrence!

Ash and the team at Amour provide an amazing, professional service! When it comes to skincare, Ash is passionate, has comprehensive knowledge, and can tailor recommendations to your skin and circumstances. Thanks Amour team!
