#### WHY WE SHOULD BE CHANGING OUR SKINCARE DEPENDING ON THE SEASON

Coming into the colder weather you might begin to feel some changes happening within the skin. Why is that you ask?

The skin can become drier and more sensitive during the colder months due to the low humidity in both the wintry air outdoors and inside heated homes. This affects our skin's hydration and can result in the skin feeling tight, flakey & inflamed.

#### OUR TIPS:

- Limit having hot showers
- Switch to a richer moisturiser & cleanser
- Exfoliate to remove dry flakey build up to smooth out any texture
- Book in for regular facials to deeply nourish & hydrate the skin as well as remove dead skin cell build up

#### THE MOISTURISER YOU NEED TO GET YOU THROUGH WINTER & LIFE IN GENERAL

DMK's Maximum Moisture deeply penetrates and nourishes the skin at a cellular level. Unlike other cosmetic moisturisers that stay on the skin's surface, it delivers water into the skin, firming & hydrating the skin.

It also helps prevent stretch marks through pregnancy and extends tans without a greasy after feeling. A brilliant option for little bubbas, kids & any red, itchy reactive skin conditions anywhere on the body

## WARM UP WITH A HOT STONE MASSAGE

There is nothing better than one of our Relaxing Hot Stone Massages in Winter to warm your mind, body & soul.

A Hot Stone Massage melts away any tension & stress, relieves muscle stiffness & increases circulation & metabolism. The Hot Stones have a sedative effect that promotes extra muscle relaxation allowing access to your deeper muscle layers.

## WHY WE LOVE OUR LASH LIFTS

- Lash Lifts are a type of beauty treatment that straightens & lifts natural eyelashes upwards to create a longer, fuller look.
- Lash lifts typically last between 6-8 weeks, depending on the individual's lash growth cycle.
- Unlike lash extensions, which require regular maintenance and touch-ups, Lash Lifts are a low-maintenance option that require no additional upkeep & cause no damage to your natural lashes.
