JUST BECAUSE THE SUN HAS DISAPPEARED DOESN'T MEAN OUR USE OF SPF SHOULD!

One of the most important things you can do for your skin is to apply a good quality sunscreen every day, all year round! Sunscreen protects your skin from the sun's harmful UVA and UVB rays, which cause skin aging, fine lines, wrinkles and age spots that make skin look prematurely older. The dangerous rays also cause sunburn and are carcinogens (cancer-causing), which is why you should invest in a sunscreen which offers broad-spectrum protection against both UVA and UVB.

HOT TIP - rub the residue of your moisturiser & SPF onto the back of your hands after you finish applying to your face daily.

DITCH THE SHAVER FOR SUGAR

Sugaring is a great way to remove unwanted hair in a more gentle way than traditional waxing. Because it uses only natural ingredients, it is a great choice for those with sensitive skins as well as anyone looking to reduce the pain & trauma experienced during waxing. Hairs become thinner, more sparse & results can last up to 6 weeks.

- Less painful
- Gentle exfoliation for the skin
- Reduced ingrown hairs

The products in the kit last 3 months & range from \$140-\$149 and are also perfect to use as a travel kit.

All Skin Kits include a cleanser, moisturiser & mist as well as a Daily SPF suited to your skin type & conditions.
